Engineering Services**

ABOUT US

EPS SUPPORT: ENGINEERING EXCELLENCE & INDUSTRIAL SOLUTIONS

EPS Support is a trusted provider of engineering design, drafting, and industrial compliance solutions, delivering precision, efficiency, and regulatory adherence across various industrial sectors. Our team of highly qualified engineers and drafting experts ensures that every project meets the highest industry standards while optimizing costs and enhancing productivity.

We are experienced and highly-recommended engineering consultants in oil and gas in and around GCC Region for four decades. EPS Support Services is specialized in Renewable Energy and Hydro Carbons Project Consultancy.

OUR VISION AND MISSION

Vision: To be the premier strategic partner for companies seeking sustainable success in the Middle East business ecosystem, recognized for our expertise, integrity and results-driven approach.

MISSION: To enable seamless business integration and operational excellence for international companies entering or expanding in the Middle East market through specialized consultancy services and deep local knowledge

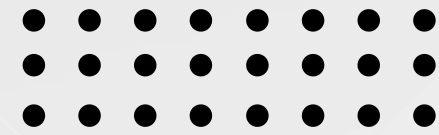

Our Engineered Equipment Division

- » Our “Engineered equipment” division is the flagship segment that looks after the Electro-mechanical, Instrument, Communication and Lighting products in Saudi Arabia and the wider Middle East.
- » We cover entire process industry comprising Oil & Gas, Petrochemicals, Utility Projects and Infrastructure Projects
- » We represent major global brands to cover comprehensive range of solutions and products tailored to cater the needs of our valued customers.
- » We help build, connect, power and protect valuable assets and critical infrastructure.
- » We believe in renewable energy and electrification to change the world with digitization, green energy and grid modernization.

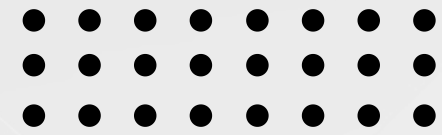

EPS ENGINEERING SERVICES

ENGINEERING & DRAFTING SOLUTIONS

EPS Support is a trusted provider of engineering design, drafting, and industrial compliance solutions, delivering precision, efficiency, and regulatory adherence across various industrial sectors.

Our team of highly qualified engineers and drafting experts ensures that every project meets the highest industry standards while optimizing costs and enhancing productivity.

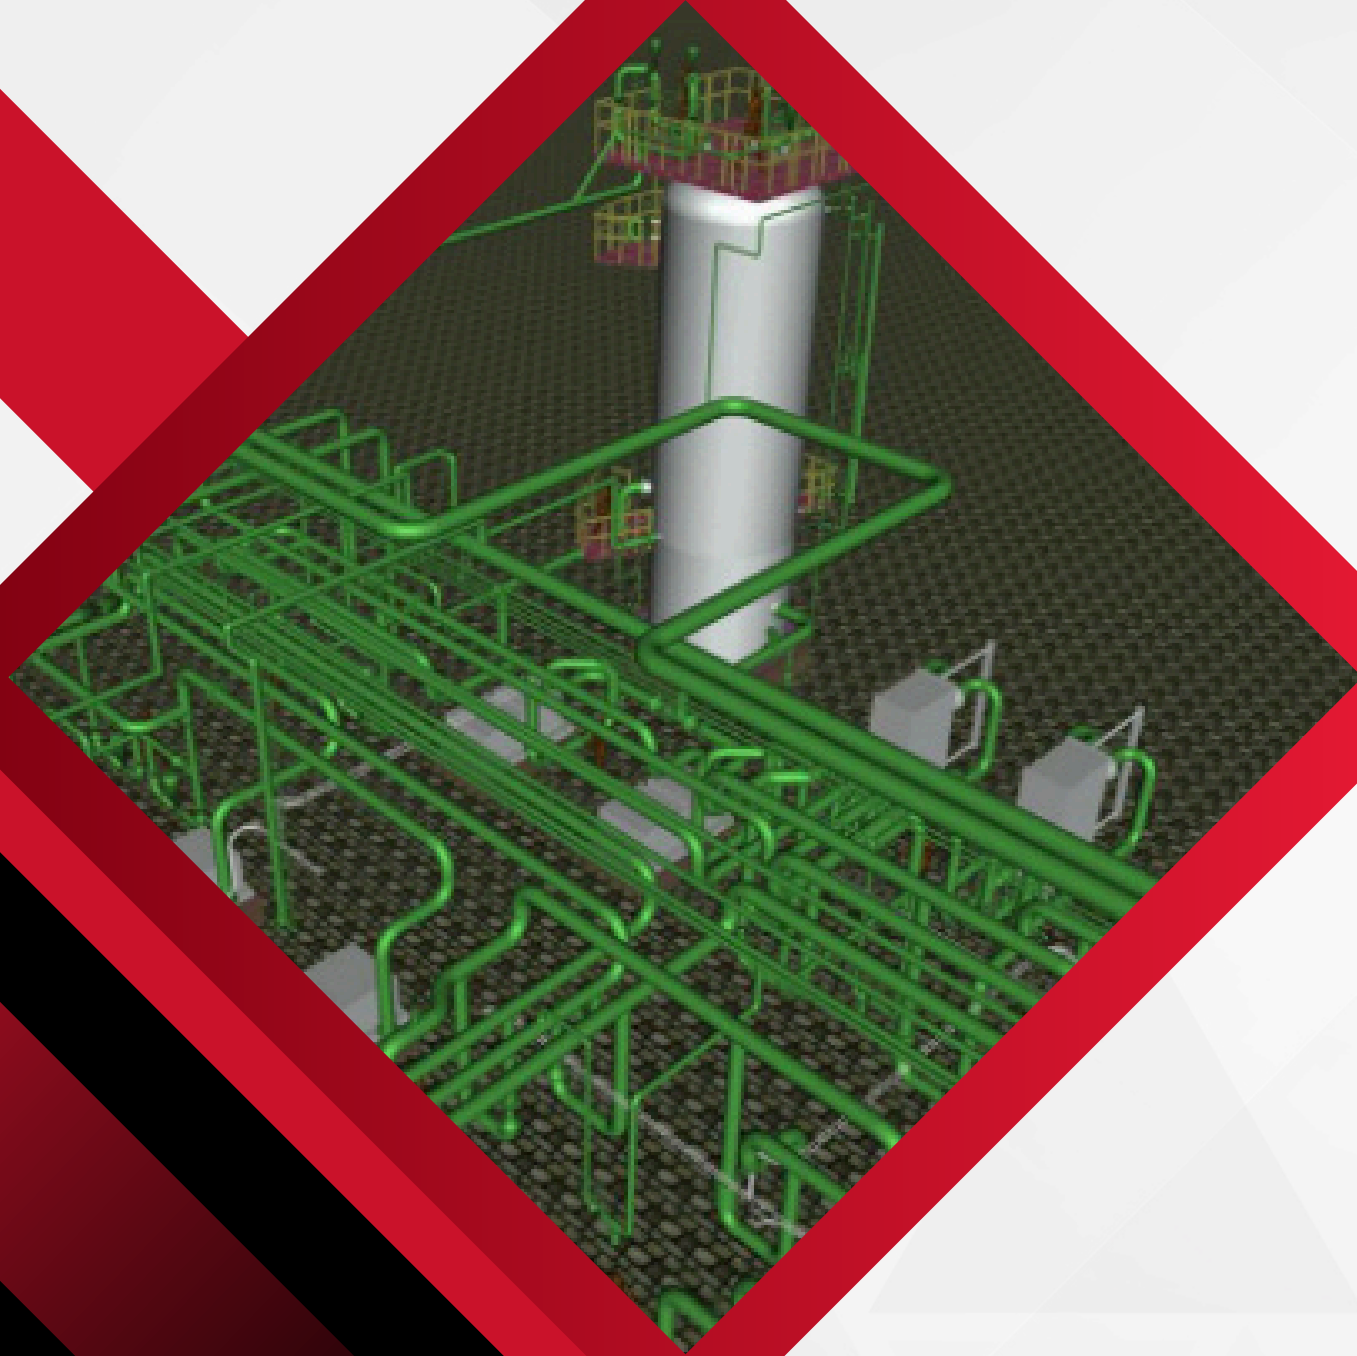

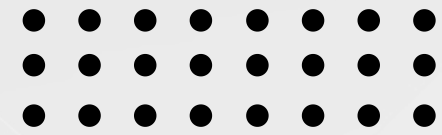

EPS ENGINEERING SERVICES

PIPING DESIGN & DETAILING

Our piping design and detailing services focus on efficient layouts, material optimization, and compliance with industry standards, reducing waste and minimizing installation and maintenance costs.

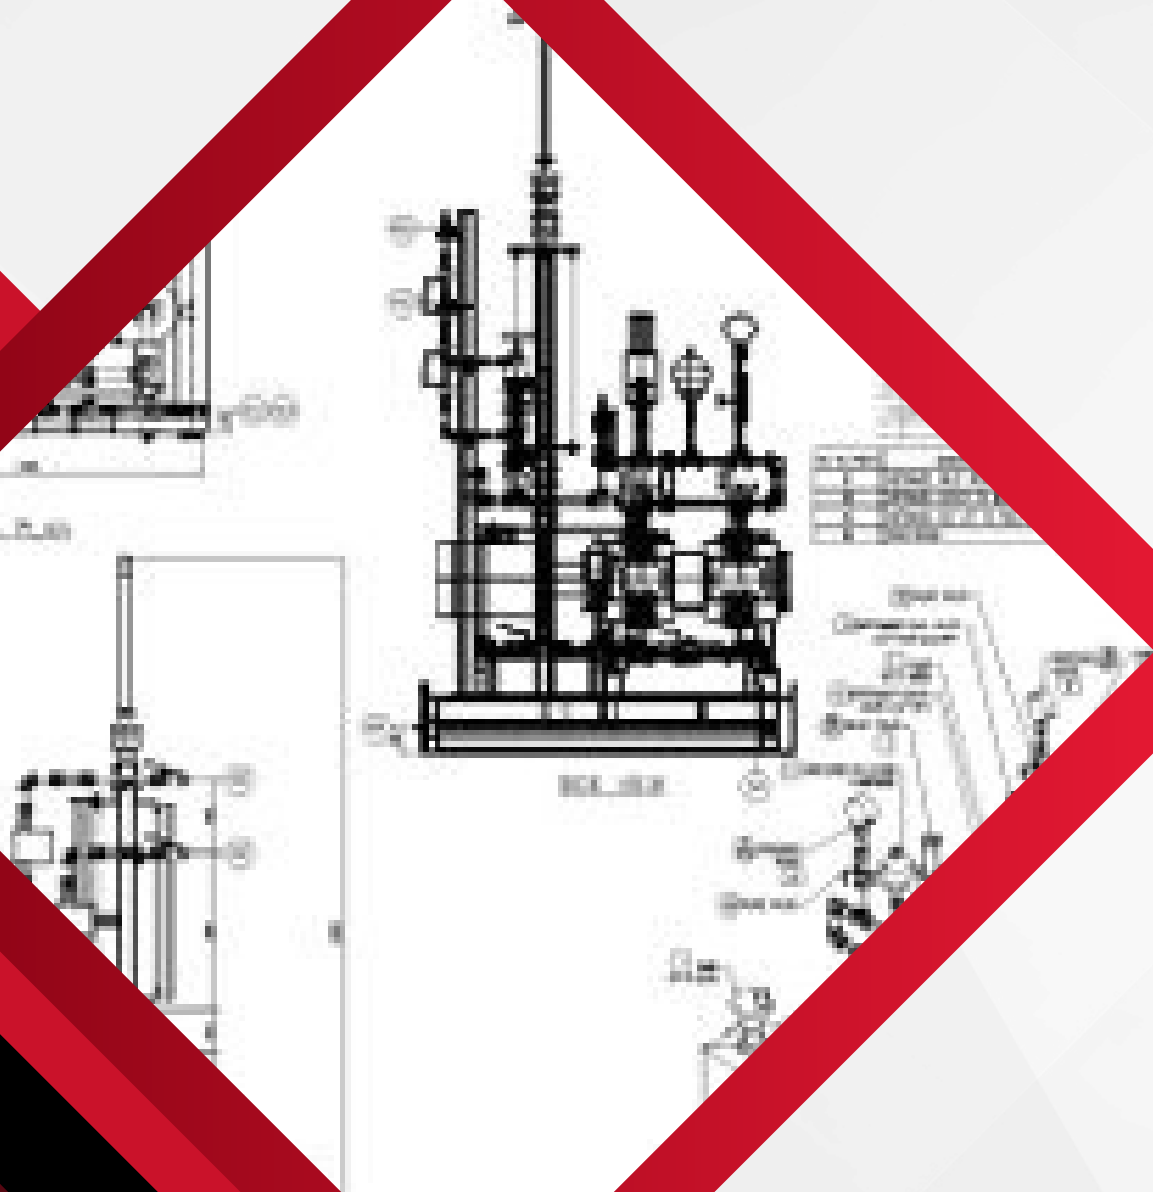

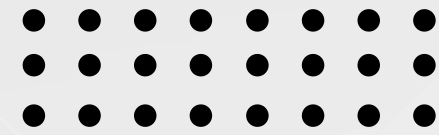

EPS ENGINEERING SERVICES

STRUCTURAL DESIGN & DRAFTING

We deliver code-adherent structural designs, ensuring safety, durability, and cost-effectiveness. Our detailing and drafting services cover everything from frameworks to support structures, meeting local and international standards.

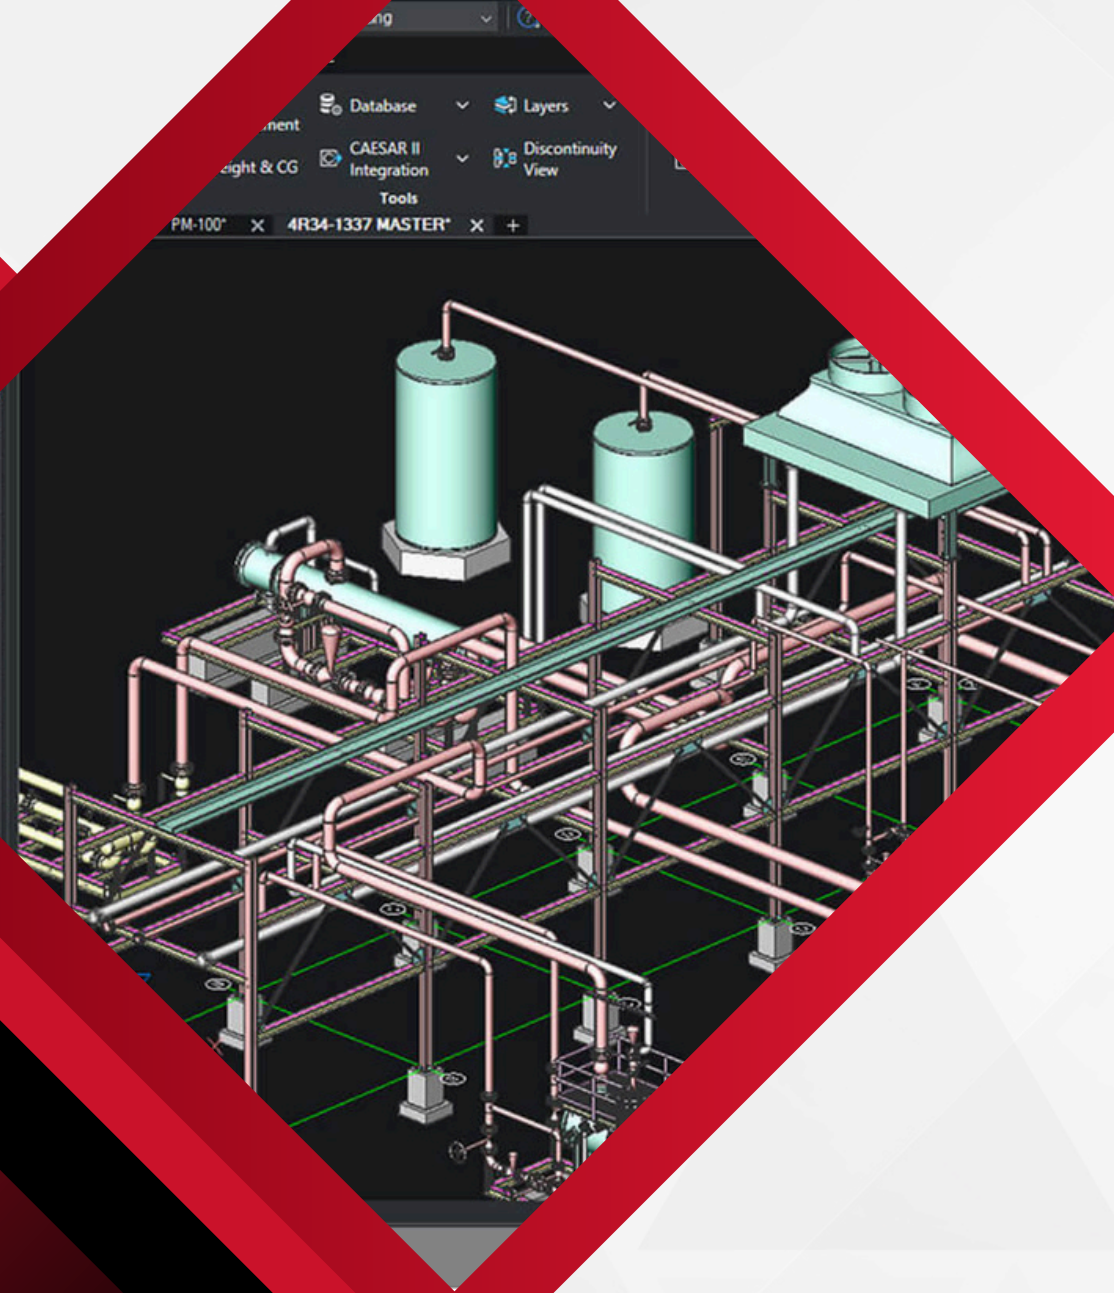

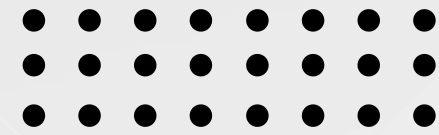

EPS ENGINEERING SERVICES

CADWORX PLANT 3D MODELING

With advanced CADWorx Plant 3D modeling, we provide highly accurate plant layouts and visualizations, helping businesses optimize design accuracy and project execution.

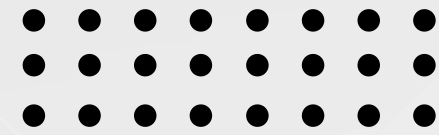

EPS ENGINEERING SERVICES

PROCESS SKID ENGINEERING

We specialize in modular skid design for oil & gas, petrochemicals, refineries, and industrial plants. Our services cover piping system analysis, structural framework engineering, and 3D modeling, ensuring seamless integration and compliance with ASME and API standards.

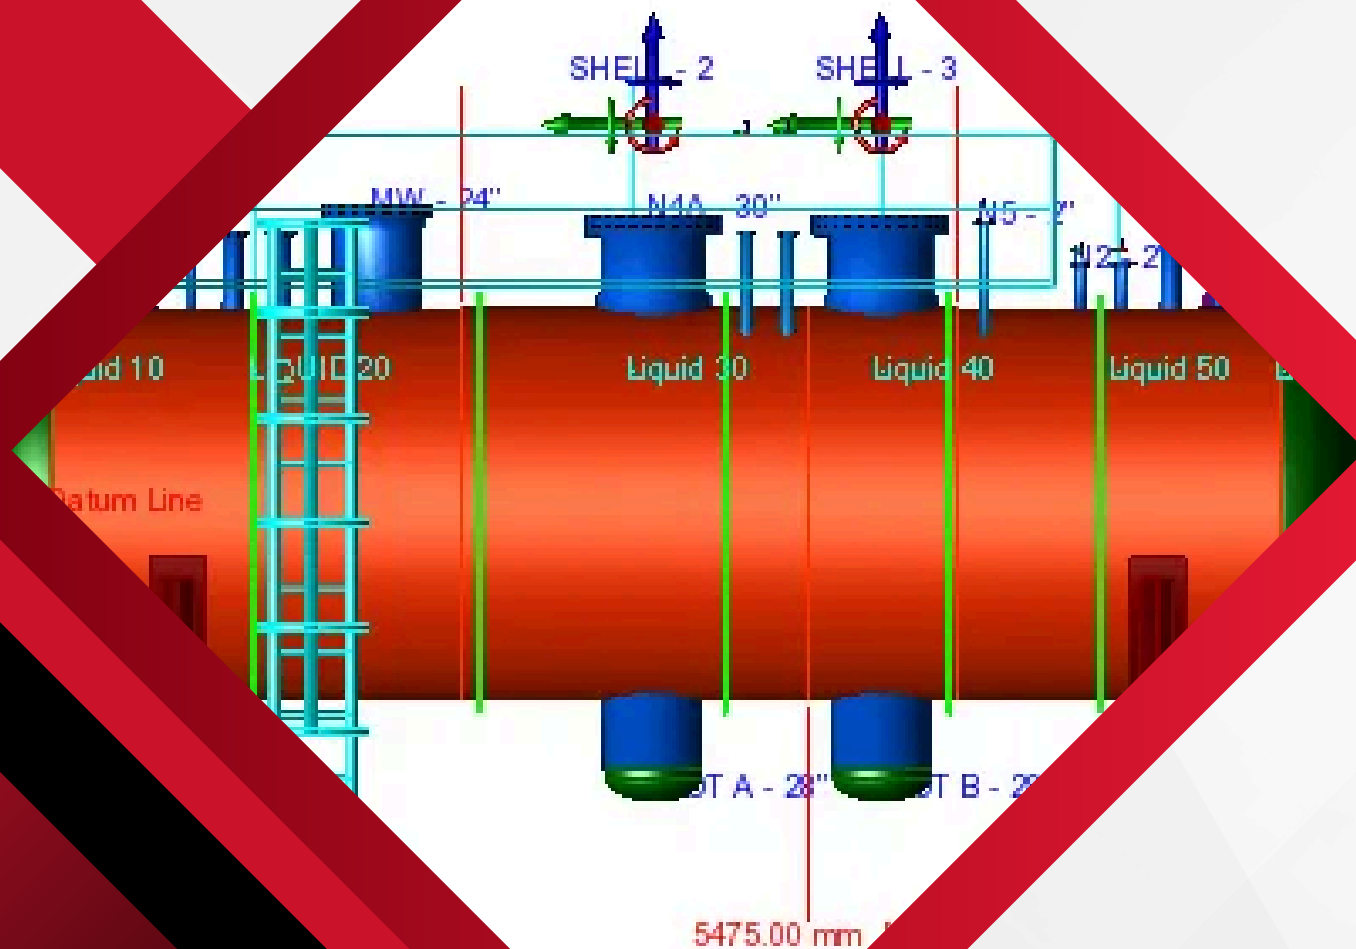

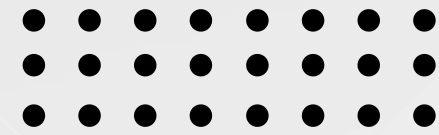

EPS ENGINEERING SERVICES

PRESSURE VESSEL & EQUIPMENT DESIGN

Our ASME-compliant pressure vessel design services include fabrication-ready drawings, internal support design, and lifting arrangements. We help businesses streamline their manufacturing and compliance processes, ensuring optimal performance and safety.

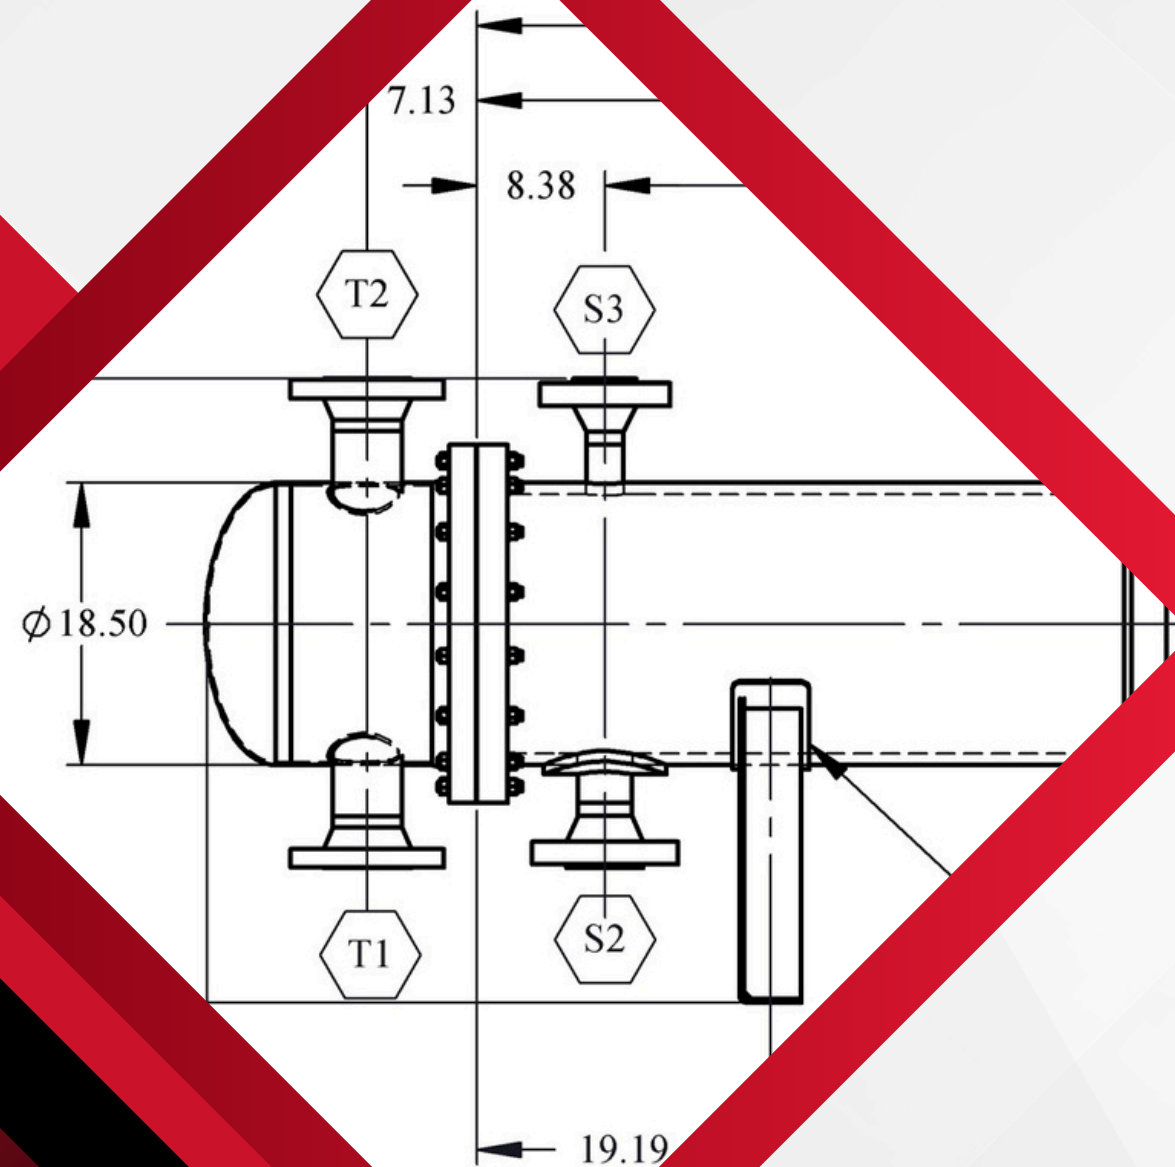

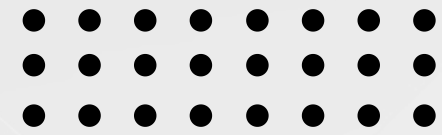

EPS ENGINEERING SERVICES

HEAT EXCHANGER DESIGN & FABRICATION

We provide TEMA and ASME-compliant heat exchanger design, covering tube sheet design, fabrication detailing, and hydro-test arrangements. Our expertise ensures efficiency, durability, and seamless integration into industrial systems.

EPS ENGINEERING SERVICES

ELECTRICAL AND INSTRUMENTATION ENGINEERING

EPS provides comprehensive Electrical and Instrumentation (E&I) Engineering Support, ensuring seamless integration, compliance, and efficiency in industrial projects. From power distribution and control systems to instrument calibration and automation.

WHY CHOOSE EPS

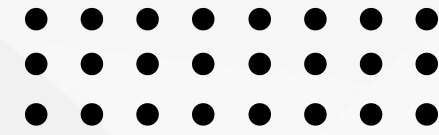

WHY CHOOSE EPS SUPPORT FOR ENGINEERING SERVICES?

At EPS Support, we go beyond standard engineering services. We provide strategic solutions that drive industrial efficiency and compliance. Our expertise in engineering design, drafting, and industrial regulations ensures that businesses operate with precision, cost-effectiveness, and adherence to global standards.

OUR COMMITMENT TO EXCELLENCE

- ✓ **Industry Expertise:** Decades of experience in engineering consulting and industrial compliance
- ✓ **Regulatory Compliance:** Specialized in Aramco-approved consultation services & vendor induction.
